Delivered for you by:

THE GREAT NORTH RAIL PROJECT

The Great North Rail Project is a vast programme of improvements to transform train travel for customers in the North.

It will enable hundreds more trains to run each day: more trains with more seats, running more quickly and more reliably. Train customers are the immediate beneficiaries of improved transport links (or connectivity) between towns and cities in the North.

As new opportunities, including jobs, are created and businesses get access to a greater pool of talent, local communities and the wider regional economy will feel the knock-on benefits of the Great North Rail Project.

WHAT DOES THIS MEAN FOR YOU?

Since October 2015, work has been taking place on the Ordsall Chord. This will be 300 metres of new track that will create a link between Manchester city centre's main train stations for the first time. This new section will be to the north west of Castlefield Junction, linking the line with the Deal Street Junction line, connecting Manchester Victoria, Oxford Road and Piccadilly stations. However, for this vital piece of track to be fitted, a huge amount of work needs to take place beforehand. This includes realigning existing track, building new bridges, removing disused arches and restoring Grade I listed structures.

Once the work is completed in December 2017, the chord will help provide many benefits not only to passengers but also to the wider economy.

Always plan your journey and check before you travel at nationalrail.co.uk
